AMERICAN ANGUS SIRE SUMMARY FALL 2007

ABS is now offering both female and male sorted semen to meet the growing needs of beef producers.

Breed leaders NORSEMAN KING, NEW DESIGN 878, IN FOCUS, ANALYST and FORESIGHT are available now with more bulls available in the near future. Call for the latest availability.

- ABS Sexation™ is produced at ABS Global headquarters in DeForest, WI, USA, incorporating ABS quality standard of excellence.
- ABS Sexation utilizes flow cytometry technology (the current industry standard) to differentiate and sort female and male sperm.
- ABS Sexation product is packaged in ¼ cc straws.
- ABS Sexation is recommended for use with heifers, not recommended for timed synchronization projects or for super-ovulated females.
- Inseminate 12 hours after an observed/expressed heat.
- In well-managed programs, conception rates will average 75-90% of conventional semen.
